

NYSIDDDNA 2023 – List of Programs with Abstracts

INSTRUCTIONS: When registering for the Annual Conference, please select your 1st and 2nd preferences for each Concurrent Session. Below are the program descriptions that will provide you with more information about each program.

CONCURRENT SESSION MON-1

MON-1.1 Spots and Dots: The GOOD and the BAD!!!

Judith Mysliborski, MD

Early recognition of a skin cancer can save a life. Equally important is knowing who is at high risk and following them closely. Educating patients on minimizing risk factors and doing self-exams of their 'birthday suits' regularly is part of good medical care. Everyone needs to pay attention to the 'spots and dots' on their skin.

MON-1.2 Safe Practice in ID/DD Nursing: What a Prudent Nurse Would Do - Fred Wetzel, RN, PhD, LNC, NCC

This session will discuss professional practice and regulatory requirements of which nurses in the ID/DD field should be aware. Topics include: OPWDD requirements by type of facility, standards of nursing practice in ID/DD nursing, supervision of unlicensed staff, documentation (i.e., what are the expectations), and legal aspects of ID/DD nursing (practicing safely within boundaries, avoiding negligence/malpractice risks).

MON-1.3 Palliative & Hospice Supports for People with Intellectual and Developmental Disabilities in Agency Settings

Ashley Keagle, LMSW

As people continue to live longer, we are challenged with the adaptation of service delivery as it pertains to aging in place, and supporting through to the end of life. Utilizing community supports to develop relationships on how best to serve within one's own expertise can drastically benefit outcome for the quality of life for people with intellectual and developmental disabilities, their families and support circles. This presentation will explore how the connections create opportunity, growth and understanding to enhance service delivery to its fullest potential.

CONCURRENT SESSION TUE-2

TUE-2.1 Engaging the New DSP: Determined, Supported, and Proficient - Anne Payette, FNP-BC

This presentation will focus on some of the key challenges facing the educator in adult learning, particularly as these challenges pertain to working in the field of ID/DD. Focus will be given to identifying and managing challenges within the educational setting, meeting the needs of learners throughout the lifespan, and tips for engaging the adult learner in the educational experience, focusing on engagement and retention of information.

TUE-2.2 Dysphagia 201: Beyond the Basics

Steven M. Asofsky, MA, SLP-CCC/TSHH

The purpose of this presentation is to educate the participants on signs and symptoms of swallowing disorders concomitant to their diagnostics and treatments. The information provided will be inclusive of but not limited to the anatomy and physiology pertaining to the stages of the swallow, diagnostic procedures, and diet consistency variants to provide safe and efficient nutritional support.

TUE-2.3 Assistive Technology & Medication Administration Supports - Melinda Dolezal, MA, and April Diffe

Advances in assistive technology have made it easier for individuals with disabilities to live more independently than ever before.

Depending on the device, assistive technology can also help support staffing in various settings. Some examples of technology include pill dispensers, medication reminders, alarms, and more. In this presentation, staff from the Technology Related Assistance for Individuals with Disabilities Program (TRAID) will discuss the benefits of assistive technology, demonstrate several devices, and share information on the programs' new telehealth video resource.

CONCURRENT SESSION TUE-3

TUE-3.1 *The Intersection of Ableism and Ageism: The Impact on Older Adults with IDD* - Laura Robinson, MPH

Age is not a simple construct nor a single process, it is multidimensional. Disability is part of the human condition. Most people will be temporarily or permanently impaired at some point in life, and those who survive to old age will experience increasing difficulties in functioning. People who are older and people with disabilities experience significant discrimination in the US and around the world. This presentation will describe ageism, ableism, and the intersectionality of these two types of discrimination on older adults with intellectual and developmental disabilities (IDD) as well as what we can do about it.

TUE-3.2 *Beyond Serotonin: Exploring the Bidirectional Gut-Brain Connection in Mental Health* - Lara Zakaria PharmD MS CNS IFMCP

For decades, approaches to treatment of depression and anxiety have focused on neurotransmitter balance and function. In this presentation we will explore the multitude of factors that impact mental health, including inflammation and environment, but focusing on the gut-brain axis. Taking that etiology into consideration, we will look at implications of diet and nutraceuticals on improving mental health outcomes using a personalized approach.

TUE-3.3 *A Review of Treatment Therapies of Diabetes, Current ADA Guidelines, and Continuous Glucose Monitoring* - Harsh Kothari, PharmD

This presentation will define type I and type II diabetes, various oral and injectable treatment options of type II diabetes, and the appropriate use and monitoring of diabetes medications. It will include a detailed review of updated 2023 ADA guidelines, various features of continuous glucose monitoring systems, and candidates who can benefit from these systems.

CONCURRENT SESSION TUE-4

TUE-4.1 *Practical Tips for Drug Allergy & Rashes* - Allison Ramsey, MD

This session will cover commonly encountered drug allergies in clinical practice, including urticaria, delayed maculopapular rash, angioedema, drug reaction with eosinophilia and systemic symptoms (DRESS), and Stevens-Johnson Syndrome. The session will also cover other rashes, including acute urticaria, molluscum contagiosum, keratosis pilaris, irritant dermatitis, and contact dermatitis.

TUE-4.2 *Advance Care Planning: Health Care Proxies & MOLST for Individuals with I/DD* - Patricia Bomba, MD, MACP, FRCP

The session focuses on the advance care planning process, clarifying differences between standard medical care, advance directives and MOLST/eMOLST. Key elements needed for completion of a health care proxy will be defined. Appropriate populations and proper completion of MOLST will be addressed, including the 8-Step MOLST Protocol and OPWDD MOLST Checklist. The goal is to increase thoughtful end-of-life discussions for seriously ill individuals with I/DD earlier in the disease trajectory before an emergency occurs.

NYSIDDDNA 2023 – List of Programs with Abstracts

TUE-4.3 Seizure Training for Nurses - Rachel Yattaw, BS

This presentation will cover the background, causes, diagnosis, treatments, and care for epilepsy. It will also go into detail about different types of seizures and epilepsies, including videos to assist with seizure recognition. We will discuss the impact seizures have on a person's life as well as how to support someone while having a seizure.

CONCURRENT SESSION TUE-5

TUE-5.1 Interprofessional Care and the Group Home Nurse

Susan Prendergast, RN, BS; Vincent Siasoco, MD, MBA; Fred Wetzel, RN, PhD, LNC, NCC; Benjamin Margolis, MD; Dian Chin Kit-Wells, DDS

A primary care physician, dentist, and neuropsychiatrist will discuss their interprofessional roles in the care of an individual with IDD living in a group homes. The residential RN will discuss their role as the clinical leader at the group home and coordinating care with an interprofessional team externally and internally with staff.

TUE-5.2 Autism – History and Features of the Diagnosis

Jill Hamilton, PhD

This presentation will provide an overview of autism spectrum disorder and will include the history of the diagnosis, current diagnostic criteria, and assessment measures used.

TUE-5.3 Active Shooter Site Preparedness – Considerations for your Organization - Jason Hopper, MBA

In today's work environment, staff need to prepare themselves for the possibility of a hostile intruder the same way they would prepare themselves for a fire. Unlike that scenario, where everyone evacuates, an active shooter scenario is much more complex. Basic protocols like *Run, Hide, Fight* are not enough. This presentation will help put staff at ease and explore various options that your organization can pursue to give staff a better sense of what role they can play in saving their lives and the lives of others.

CONCURRENT SESSION WED-6

WED-6.1 When Every Moment Counts: Case Studies in Sepsis Identification, Evaluation and Prevention in the ID/DD Setting

Anne Payette, FNP-BC

The purpose of this presentation is to utilize a case study approach to sepsis identification, evaluation, and prevention in the ID/DD setting. The goal is to improve understanding of sepsis in the ID/DD setting, as well as to promote the utilization of simple measures to address common factors leading to sepsis.

WED-6.2 Medications 101: Back to the Basics - Jennifer L. Grant, RPh, BCGP

This presentation will provide an overview of multiple aspects of medication dosing, delivery, monitoring, and administration. It will share highlights of Drug Interactions, Food Interactions, Labs, Monitoring Tests, Timing, & Renal / Hepatic Dosing.

WED-6.3 How Improving Oral Hygiene Can Impact Overall Wellness

Betsy Bray, BS, AS, RDH

Oral health can significantly impact overall health and wellness. Through a combination of remote, oral care patient monitoring and coaching by an RDH, CDHC (Community Dental Health Coordinator) a pilot program led by the NYSDA and supported by Lifeplan and Truthbrush shows initial, positive results towards driving behavioral improvements in the preventive care behaviors of people living with intellectual and developmental disabilities.

CONCURRENT SESSION WED-7

WED-7.1 Spotlight on Prevention: Preventing Intestinal Obstructions - Tara Kenney, RN and Kim Affinati, MS

This presentation will provide an overview of the Justice Center's Spotlight on Prevention toolkits with a focus on the "Preventing Intestinal Obstructions" toolkit and will include a discussion of risk factors and promising practices for agencies to implement to prevent intestinal obstructions. We will discuss lessons learned from cases involving intestinal obstructions via case studies.

WED-7.2 OPWDD Surveillance Findings and Regulatory Expectation

Mary Jane Vogel, BS, RN and Brian O'Donnell, BS

This training will review common deficiencies related the health and safety of OPWDD individuals and the associated regulatory expectations. This presentation will include where regulations and guidance can be found, the nurse's role in the ID/DD setting including best practices vs minimal standards, the survey process, the 10 most common citations related to health and safety, and regulatory expectations and guidance to ensure regulatory compliance.

WED-7.3 Health Risk-Informed Telemedicine

Lorene Reagan, RN, MS; Craig Escude, MD, FAFP, FAADM; and Maulik M. Trivedi, MD, FACEP

As services for people with IDD evolve, the use of technology has grown exponentially. With the advent of CMS' "Technology First" initiative, the expectation is that technology will be utilized to promote meaningful participation, social inclusion, and quality of life and reduce health disparities for people with IDD. IDD nurses need information about their role in the use of various technologies in place today. This panel presentation highlights a model for health risk-informed telemedicine supports.

Keynote and Capstone Presentations – Descriptions

You will not select a program for the keynote or the capstone presentations. Everyone will attend the same presentation.

KEYNOTE PRESENTATION – Monday, 2:15-3:30

Upstream Medicine: Swimming Against the Current to Improve Patient Outcomes - Lara Zakaria, PharmD, MS, CNS, IFMCP

There is increasing interest in the integration of conventional medicine with complementary, and alternative medicine (TCAM) as well lifestyle medicine that can improve outcomes for chronic diseases. Evidence is mounting that to make significant improvements in health outcomes, we must start thinking outside the medicine vial – to lifestyle modification including nutrition, stress modification, sleep, and exercise. How do holistically minded health professionals find opportunities to coach and inspire our patients in these areas – while cultivating a supportive and collaborative professional environment.

CAPSTONE PRESENTATION – Wednesday, 11:15-12:30

OPWDD Update – A Discussion with Susan Prendergast

Susan Prendergast, RN, MS

In this session, Susan Prendergast, Director of Nursing and Health Services, Statewide Services, NYS Office for People with Developmental Disabilities, will discuss current guidance documents that are essential for nurses working in the ID/DD field, provide updates on the work being done by OPWDD, and address hot topics. Participants will have the opportunity to ask questions.
